HAIR NON-SURGICAL HAIR GRAFTS

This is no hair piece! Our hair grafts are made of dermal membranes that closely resemble a layer of human skin in transparency and thickness. In essence it is nothing more than an additional layer of skin added to the skin you already have. It is so transparent that the actual skin on your head is visible. Actual human hair is color matched and embedded into this skin and attached to the scalp in a secure way, so that you can feel confident of it staying in place. The membranes also allow hair to be inserted into it in such a way that it can faithfully reproduce the growth patterns, layering, bounce, and fall of human growing hair. That allows for a huge advantage when it comes to styling.

Styling your new hair involves cutting and refining after it has been secured to your head. If you chose to wear your hair combed back, or spike up with product, your hairline will look just like it did before you started losing your hair. There is no visible difference, and because it is actual human hair; the feel and texture of the hair is completely natural! You can be sure that this non-surgical hair replacement solution will behave just like natural hair.

LASER HAIR THERAPY SOLUTIONS

You've probably heard about "laser hair removal," but the latest in **hair replacement** is also laser based. Laser hair therapy for purpose of restoring and stopping hair loss has been available in Europe for several years. It still new in the US, but growing in popularity and technology. If you are not comfortable with wearing grafts, using topical treatments, or surgical replacement, this therapy can be something that may prevent further hair loss and possibly stimulate new growth.*

A red laser light is used on your scalp. The beams rotate and are moved in all directions to cover the whole head. Most of the time, a hood similar to a hair dryer found in many hair salons, is placed over the scalp area and emits red light beams that reach several layers of skin. Experts believe the light speeds the production of energy at cell depth. This stimulates blood flow and helps create and repair cells, producing healthy hair follicles, resulting in new hair growth.

It is non-surgical, painless and has no known side effects!

HAIR REPLACEMENT SOLUTIONS FOR MEN

For men, male pattern baldness is sometimes referred to as androgenic alopecia. The hair follicles shrink, causing a shortened life span for hair production. There have been major strides made in the treatment of hair loss. Including the use of 5-alpha-reductase inhibitors like Propecia & surgical hair restoration. If you've tried Propecia and had little to no results, we have an option for you! If the thought of going under the knife deters you from doing something about your hair loss, we have an option for you! Male pattern baldness is no longer something that you have to accept as inevitable. It's the new millennium, and you have options!

Many of the products out there are ...in a word...quakery! Don't be fooled. We have the solution for your hair loss woes. VIP Hair Center employs thoughtful technicians, who offer experience with today's technologies, techniques, styling, and product knowledge.

WHY WOMEN LOSE HAIR

A large number of women suffer from what is known as androgenic hair loss, which is caused by hormone changes. These changes are brought on for a variety of reasons. Stress and anxiety, pregnancy, medications, or vitamin deficiencies are common reasons for woman to lose their hair. In many cases women are just unable to break down testosterone levels efficiently, which can cause hair loss for a woman.

Hair augmentation is a method of adding hair to thinning areas, and replacing it in areas where there is no hair at all. VIP's non-surgical approach to hair replacement offers variable coverage, and an adjustable solution that can be worn while sleeping, exercising, swimming and many other things that are part of your active lifestyle.

Our services and products are custom designed for each client. Hair texture, wave and color are all factors that are incorporated into the design. Our services are so close to the real thing that you can be confident that styling your hair can be done in a variety of ways, and no one will ever know that you once had hair loss issues.
